

MBK101

Wall mounting bracket for bass cabinets

The MBK101 is a mounting bracket that can be used to mount different kinds of bass cabinets with a limited size and weight. The simple, nevertheless very efficient principle provides an easy and quick installation.

It is based on two wall brackets with N-shaped notch which have to be installed against the wall on the desired location. Two cylindrical metal bushings have to be fixed to the provided points on the bass cabinet, using the included screws. Subsequently, the cylindrical metal bushings have to be hooked into the N-shaped notch of the wall brackets.

This principle provides great flexibility for installing different kinds of bass cabinets or other devices, while the distance to the wall is limited to only 14 mm.
