

The BDP06 is a 6-module wide blanking plate for use with DIN rail cover plates such as our BDR03. It is made of black plastic with a matte finish. Using the provided breaking lines in 9mm and 18mm increments, it is easy to adjust the blanking plate to the right width. The blanking plate snaps in place firmly and can still be moved into the correct position. Using the BDP06, every DIN rail cover plate gets a clean outlook without any gaps.

Product Features:

Dimensions	108 x 51.8 x 16.3 mm (W x H x D)
Weight	0.02 kg
