

BSFxxA Series

19" aluminum blind panels

An elegant 19" blind plate made of aluminum with a plate thickness of 1.5 mm and provided with a black (RAL9004) structured powder coating. The blind plate is used to fill in gaps between equipment. The choice of aluminum for these blind plates have a couple of advantages compared to their steel counterparts. Aluminum is much lighter than steel only adds a little of extra weight to a 19" rack configuration. These blind plates are ideal to quickly modify and add custom cut-out holes due to its softer material.

Variants:

- BSF01A - 1 unit
- BSF02A - 2 units
